

- Print the template on a A4 sheet of cardboard.
- Cut out the two circles and the main body of the dial.
- Gently score the dotted lines.
- Fold along the dotted lines.
- Glue the flaps.
- Choose a kebab stick or other suitable rod as gnomon;
- Gently push it through the centres of the circles.
- Go outside, align your model with the “true north-south line” and tell the time.

Gnomon to southern celestial pole
